

UNCENSORED & TRANSPAREN-C

Critical Emergency COVID-19 & Comprehensive VITAMIN C Therapy Medical Webinar

From the original front lines in China:

“Consensus of expert panel from Shanghai, China recommends IV vitamin C in the treatment of the COVID19 virus. Early reports from the principle investigator point to reduced cytokine, inflammatory burst in the COVID19 with the use of IV vitamin C. This is consistent with septic shock studies that have shown that IV vitamin C reduces inflammatory burst, ICU hospital stays, and mortality.

The only concern is that the current 24 grams IV vitamin C is not enough. The severe hypovitaminosis C levels in patients with pneumonia, sepsis, and in the ICU is known to be refractory to vitamin C replacement requiring higher dose administration of vitamin C. Could a higher delivery dose of IV vitamin C could provide even better results? The current evidence suggests yes.”

Nathan Goodyear, MD, MD(H), ABAARM, FMNM

As COVID-19 crisis is continuing to wreak havoc on our nation’s health, economy and morale, social distancing is becoming the new norm forcing cancellations of all social and professional events in a desperate attempt to flatten the curve of the pandemic spread. As a result, businesses and organizations across the globe are cancelling in-person meetings, trade conferences and business travel plans and instead turning to virtual events, including virtual press conferences, online meetings, seminars, and virtual product launches.

Critical medical education conferences for healthcare providers, with focus on life-saving therapies for Coronavirus patients, are now shifting their live seminars to a web platform to provide much needed support and training at this time.

Vitamin C International Consortium Institute – VCICI – is moving their **Emergency COVID-19 & Comprehensive Vitamin C Therapy Medical** conference from the world-famous Clearwater Beach, Florida location to a virtual platform.

Time and Place: This highly demanded and needed C'omposium will be streamed via a webinar on [May 1st-2nd, 2020.](#)

Cost: [New and Reduced Registration Fee - \\$1200 - for two full days of training!](#)

Special Offer: [A 20% discount for early registration prior to April 15th.](#)

[For Information and Registration Please contact:](#)

Tentative Agenda:

Vitamin C: A Historical Perspective

Vitamin C: Mechanisms of Action

Vitamin C: Back to Basics

- Pharmacokinetics vs Pharmacodynamics
- Bioavailability
- Vitamin C metabolism

Vitamin C Receptor and Dosing Basics:

1. Supplies
2. Preparation
3. Technique
4. Follow
5. Side/Adverse effects

Would the Real Vitamin C Please Stand Up

- Sodium Ascorbate vs. Ascorbic acid

Vitamin C in the Treatment of ...

1. Cancer
 1. What we know
 2. What we think we know
 3. What we don't know
2. Anti-viral
3. Sepsis
4. Autoimmune disease
5. Other disease

Vitamin C in Combination Treatment with ...

1. Chemotherapy
2. Radiation
3. Immune Checkpoint therapies
4. HT
5. Artesunate
6. Alpha Lipoic acid
7. Vitamin K3

Case Studies

Presenters:

Lior Sher, JD, Clearwater Beach, FL - Lior Sher is the founder and CEO of *Vitamin C International Consortium Institute – VCICI*. VCICI is a premier multi-disciplinary consortium of highly skilled experts and leading medical practitioners, dedicated to promoting research, providing resources, sharing case studies, and facilitating and expanding the high-dose Vitamin C educational and training opportunities to improve the care of immune-compromised patients with chronic and acute conditions.

Lior Sher is a well-recognized world expert on Dr. Cathcart's high-dose Sodium Ascorbate vitamin C protocol, an attorney by training, a multiple patent holder in Biotechnology space, a natural-wellness advocate, a seasoned and diverse public speaker, entrepreneur in Biomedical and Integrative Healthcare industries, highly skilled Health Sciences Executive with focus on Medical Devices and Nutraceuticals, the developer of software and mobile app technologies, and the founder, CEO and co-developer of PUR-C – the purest quality, physician-developed, vitamin C supplement, sold solely to medical providers.

Dr. Nathan Goodyear, MD, MD(H), ABAARM, FMNM Mesa, An Oasis of Healing – Dr. Goodyear has dedicated himself to a science-based approach combining his traditional medical training with alternative cancer care which integrates scientifically proven treatments and healing modalities rooted in nature. Dr. Goodyear is a Fellow in Functional and Regenerative Medicine who served on the board of the American Functional Medicine Association. He is Board-certified in Obstetrics and Gynecology and served as the Chief Resident in Obstetrics and Gynecology at the University of Tennessee where he received the Chairman’s Award in 2004. Dr. Goodyear is also a published author with two books to his name. *Man Boob Nation*, published in 2014, tackles an integrative medicine approach to low testosterone. It was followed by *Total Testosterone Transformation* in 2017.

Dr. Thomas Lodi, MD, MD(H) - Bangkok, Thailand – The Founder of Oasis of Healing and Oasis International - For almost 2 decades, Dr. Lodi and his team have been giving over 1,000 patients a new lease in life through holistic and customized programs that help people heal from cancer and restore health. For the first ten years of his 30-year medical career, Dr. Thomas Lodi worked in conventional settings as an internal medicine specialist, urgent care physician, and as an intensivist in ICU and CCU departments of various hospitals. Subsequently, Dr. Lodi continued his search for more effective and less toxic cancer therapies by training around the world, from Japan to Europe to Mexico and all around the US. Although he occasionally sees patients with a variety of medical conditions, Dr. Lodi has narrowed his scope of practice through specific training and extensive experience over the past 12 years to Integrative Oncology (caring for people with cancer). Dr. Lodi is licensed as a Homeopathic Medical Doctor MD(H) in the State of Arizona and is licensed as an Allopathic Medical Doctor (MD) in the state of New York. Dr Lodi has completed a Fellowship in Integrative Cancer Therapies and a Fellowship in Anti-Aging, Regenerative & Functional Medicine. Dr Lodi sits on the Scientific Advisory Board for Immunogenic Research Foundation (IMREF), the Medical Advisory Board for Elka Best Foundation, and is an active-allied member of the American Society of Clinical Oncology (ASCO). Dr Lodi is also an instructor in Insulin Potentiation Therapy and certified in oxidative and chelation therapies.

Additional Details will be announced in the coming weeks.
