Cancer is at an All-Time High

Over 32,000 people are diagnosed with cancer every day. One out of every 2 men and one out of every 3 women in the United States will develop cancer within their lifetime. Cancer is a complex condition with many factors contributing to its development including:

- **Processed, Denatured & Genetically Modified Food**
- **Vaccinations**
- **Environmental Toxins**
- **Food Toxins**
- **Radiation Exposure**
- **EMF Exposure**
- **Emotional Factors causing Stress in the body**

Due to the ever-present exposure to these variables, each one of us has a certain number of early-stage cancer cells in our body at any given time. Why do some people get very sick with cancer while others do not? The answer is simple...a healthy immune system. A healthy immune system works to locate and destroy cancerous cells before they can grow out of control.

Many of you may have already undergone conventional therapies but may not have had the results you were hoping for, while others of you have only recently been diagnosed and are researching all of your options before embarking upon a definitive course of action.

If you or a loved one has been diagnosed with cancer, there is hope for healing. Healing is a journey. It takes time for the body to reverse the damage of the illness, cleanse and rebuild. It requires your dedication and commitment. The staff at *An Oasis of Healing* would like to assist you along the path of your return to health.

Our Approach / Philosophy

Our approach to the treatment and management of cancer can be best understood as a comprehensive approach. We treat cancer patients by combining a number of proven and highly successful modalities including a living food nutrition program, detoxification and cleansing therapies, Insulin Potentiation Therapy, Hyperthermia, and many natural IV therapies including botanical, vitamin and mineral compounds. Additionally, we utilize mainstream and alternative immune boosting medications to enhance and support optimal functioning of the immune system. The basic philosophy of our treatment program is to:

- Teach patients how to Stop Making Cancer
- Selectively Target and Eliminate the Cancer
- Rebalance and Enhance the Immune System
- Integrating Mind/Body/Spirit to increase healing and restore balance

Because we recognize that everyone is unique, we personalize every patient's treatment plan, basing the plan on *who* you are, not your diagnosis. We use a team approach in your care and fully encourage your participation in the decision making process. We continually monitor your progress with Laboratory Testing and imaging when required or needed.

We believe that the relationship between healers and those seeking health is sacred. These relationships define the fundamental "soil" in which health can emerge and blossom. In conventional medical circles, the relationship between doctor and patient involves the patient "handing over" to the physician their "disease" and hence the responsibility for its resolution. This implicit contract is doomed to failure since it is based upon fallacious reasoning and false premises. WE, on the other hand, ask that you step out of the "quagmire of disease" and embrace and commit to the experience of restoring your health and vitality!

How to Stop Making Cancer

It must be understood that in order for health to be restored, whatever factors that were involved in the development of cancer must be eliminated. Stopping cancer growth within the body requires eating nutritional-dense foods and thorough body cleansing. Malnutrition from nutritionally-void foods leaves the body depleted, unprotected and weak, providing an environment for cancer growth. Optimal nutrition rebuilds the immune system, cleanses the body and supplies nutrients essential for healing and repair. Colon cleansing, infrared sauna, lymphatic drainage massage, juice fasting and other lifestyle changes continue to allow the body to remove toxins that contribute to cancer growth.

We offer a full range of nutritional education, hands on instruction and interactive discussion and audio and visual media. Our mission is to impart enough knowledge, and support for you to become completely comfortable and self-sufficient in continuing this healing lifestyle long after you return home, and for the rest of your life.

What Types of Cancer Do We Treat?

At An Oasis of Healing we have performed thousands of IPT treatments on hundreds of patients with all types of cancer including, but NOT limited to, the following:

- Bladder
- Breast
- Cervical
- Colon
- Head and Neck
- Liver
- Lung
- Lymphomas
- Ovarian
- Pancreatic
- Prostate
- Stomach
- Uterine

What is Insulin Potentiation Therapy (IPT)?

Cancer cells have up to 19 times more insulin receptors than normal cells because glucose is their primary energy source. Insulin Potentiation Therapy (IPT) uses low doses of insulin to open up the cell receptors or “doorways,” allowing the chemotherapy agent to specifically enter the cancer cells, while leaving the normal cells mostly unaffected. Because of this selectivity, a higher amount of the agent can enter the cancer cell, requiring only 5-10% of the normal chemotherapy dose to be used. Again, this creates far less toxicity to normal cells, yet builds up lethal drug levels in cancer cells.

What Are Immune Enhancement Therapies?

- **High Dose IV Vitamin C**
- **Curcumin**
- **DCA**
- **Artesunate**
- **Quercetin**
- **Hyperthermia**
- **Nutritional IV's**
- **UBI & Ozone Therapies**
- **Nutrition & Nutritional Supplements**
- **Colon Cleansing**
- **Immune enhancement therapies**

Because the body is truly an amazing connection of physical, emotional and spiritual components, we further encourage stress reduction & management, release from emotional trauma(s) and spiritual development as essential elements in healing. Our primary goal is to provide a healing atmosphere that will encourage you along your healing journey.

Expected Outcomes

The results using this integrative approach with most patients and most types of cancer, far surpasses what is being achieved in conventional oncology, particularly in those with end stage diagnoses. In some cases, the outcome has been complete remission of the cancer. In others, the patient's life has been prolonged by months or years. In yet others, the treatment minimized or eliminated the pain and suffering these patients were enduring in their final days and allowed them to spend their final days or weeks living, instead of dying.

What Are the Treatment Programs and Costs?

At An Oasis of Healing we combine multiple modalities in our approach to the treatment of cancer. The Comprehensive Integrative Cancer Program is the most aggressive cancer treatment program incorporating IPT , High Dose IV Vitamin C, B17, ALA, Curcumin, DCA, Hyperthermia, Ozone therapy and Immune enhancement therapies with a full range of adjunct therapies including education and complete participation in an optimum healing lifestyle. The Comprehensive Integrative Cancer Care program cost averages from \$11,000-\$13,000 per week, depending on the extensiveness of therapies recommended. Cost may also vary depending on the use of IPT, then the cost of agents used and whether or not the patient has insurance that will cover some of these and other costs i.e. laboratory fees.

Will Insurance Pay for any of the Services?

Payment for the program is made in advance at the commencement of treatment. We will provide you with an invoice for certain items which then may be submitted to your insurance company for reimbursement if it is not Medicare or a federal/state plan. We are a non-participating provider so any reimbursement made by your insurance company would be done on the basis of out-of-network benefits. Medicare does not pay for any of our services, nor can any of our services be submitted for reimbursement to Medicare.

How Long and Where Will I Stay?

An Oasis of Healing is an out-patient facility yet patients arrive at 8am and are usually at the center engaged in different aspects of their program until 4 pm. Patients usually receive treatment five days a week.

For our Comprehensive Integrative Cancer Care program a 6 to 8 week stay is recommended.

We can provide a list of accommodations with many options which include a furnished apartments, condos or suites close to our center. Depending on the season, size and quality of the accommodation preferred, the cost will range from \$1600 - \$2400 per month.

What Do I Do Now?

If you want to discuss your treatment options or for more information about *An Oasis of Healing* please call us directly at **480-834-5414** or respond via email to info@AnOasisofHealing.com.

***We look forward to walking
the Healing path with you...***
